CENTRIFUGES

FIRLABO

4x250 ml Ventilated Refrigerated

SECURITY, EFFICIENCY, SAFETY

rlabo have a long history of designing and manufacturing centrifuges.

This ability allows them to maintain a wide range of models which meet the needs of many customers.

SW9 centrifuges can spin tubes from 0.2 to 250 ml which makes them suitable for clinical, biological and research applications as well as for industrial uses.

SW9 centrifuges will accept most of the commonly available tubes and microplates.

The range has been designed to be easy to operate and programme and to simplify servicing and functional testing.

As an overview, the range includes ventilated, refrigerated and thermostatically controlled models.

They can bench mounted, or mounted on trolley with castors.

The versatile controlsystem gives the operator many options and provides access to useful technical data held in the memory.

The brushless, induction

motor greatly reduces servicing intervals.

SW9 centrifuges can repeat specific programmes to ensure reproducible results.

SECURITY: Sealed carriers as standard, lid locks, imbalance detection, powerfull induction motor.

EFFICIENCY: Parameters are display alphanumerically, a buzzer sounds at the end of each cycle, speed displayed in g or rpm, a code-protected programmable cycles and one fast cycle, controlled acceleration and deceleration rules to protect your cells, the lid has assisted closing and a safety lock.

SAFETY: For optimum safety whits in use, the **SW9** range is extremely robustly constructed and is designed for calability.

POLYVALENCE OF DESIGN AND USE

SW9 R and SW9RH

The internal cooling system operates quietly to maintain $+4^{\circ}\text{C}$ at 4500 rpm when long cycles are used. To protect environment, only **CFC** and **HCFC** — free refrigerant gazes are used.

SW9 and SW9H

The non-refrigerated models are quiet and easy to use. The H (high) models are mounted on a trolley with castors. They are easy to move and save laboratory space.

SPECIFICATION

Maximum speed with carriers (rpm)	4500							
Maximum speed with angular rotor (rpm)	7700							
Maximum acceleration with carriers (g)	4200							
Maximum acceleration with angular rotor (g)	9200							
Maximum capacity with carriers (ml)	4 x 250							
Maximum capacity with angular rotor (ml)	8 x 100							
Type of motor	Induction motor without brushes							
Microprocessor controller	as standard							
Acceleration	9 programmable ramps							
Braking	9 programmable ramps							
Program storage	10 programs in memory							
Radius	Standard 60 W 6							
Integrated maintenance	Standard S N S							
Sealed carriers	Standard							
	SW9	SW9H	SW9R	SW9RH				
Gross weight (kg)	70	86, 6	97	105				
Net weight (kg)	60	95 0	83	93				
Dimensions HxWxD (mm)	415x476x600	995x476x600	415x690x600	995x476x600				
Input power maximum (W)	900	900	1500	1500				
Temperature range	JB ini		From - 10°C up to + 40°C					
Temperature performance at 4500 rpm	V .		+ 4°C					

EASE OF USE

The **SW9** has an assisted closing system which makes opening and closing the lid very easy. Just lower the cover and the centrifuge will close and lock by itself.At the end of the cycle, press "open" and the cover will open automatically.

EQUIPMENT

Туре	Reference	Capacity	(mm)	Tube height	Maxi radius (mm)	Maxi speed (rpm)	Maxi acceleration (g.)
